Annotation: This article describes the higher education system of the Republic of Uzbekistan. The reforms implemented in the field of development were discussed.

Key words: higher education, youth, ministry: new educational system, educational development,

It is known that today in our country there is a large scale in every field reforms are being implemented. In turn, these reforms are significant part of it is organized by the reforms implemented in the education system. Last organized all stages of education based on modern requirements practical works are being carried out. Including in the higher education system reforms and practical measures are being implemented on a very large scale.

President of the Republic of Uzbekistan Mirziyoyev Shavkat Miromonovich At the solemn ceremony dedicated to the day of teachers and coaches as they noted: It is clear to all of us that the cornerstone of development is This is the force that makes the country powerful and the nation great - science, education. Our tomorrow, the bright future of our country, education is first of all system and the education we give to our children.[1]

According to the thinker scholar Abu Nasr Farabi, "Education is the word for peoples and combining the theoretical virtue among the townspeople, and education is the relationship between these peoples.

Education is only through words and teaching. Ways and methods of Farabi's education their views on tools are also valuable. There are two ways of beautiful qualities in a person - formed through education and training. If it combines the theoretical qualities of education, and education is an innate quality - theoretical knowledge, and a practical profession - a craft, manners combines qualities. Education is words and learning, and education is practical work, experience says that it will be done with When both are combined, maturity is manifested, but this maturity depends on the extent to which knowledge and practical skills have been learned appears.

If the theoretical foundations of all subjects are studied in educational education, then in education spiritual and moral rules, etiquette standards, professional skills are studied will be created.

The population of the Republic of Uzbekistan under the age of 30 is 60 of the entire population is on the verge of facing a unique demographic situation of mind, spirituality, potential, culture, level of knowledge of young people without forming, we cannot look into our future.

It is no secret that a number of laws are being passed. Uzbekistan Law of the Republic on Education National Program of Personnel Training 30 a number of decisions on conception and education for the year and The adoption of laws is about the future of our youth and the development of our country. It is not for nothing that it is thought out and implemented. It covers the most urgent problems and solutions in our country today Acceptance and implementation of the concept for 30 years will lead to great changes in the field of education in our country. Education quality development of the higher education system of the Republic of Uzbekistan until 2030 the concept of the higher education system in the social sphere and economic sectors based on the needs of science, education and production improving the quality of education based on ensuring integration, competitive personnel training, effective organization of scientific and innovative activities, international cooperation for the purpose

of development, as well as 2019 of the President of the Republic of Uzbekistan No. PQ-4391 dated July 11, 2015 "Management of the system of higher and secondary special education in connection with the implementation of the decision on measures to introduce new principles developed.

The quality of education is traditionally the highest quality of teaching and scientific research a natural element at the level and an integral part of the professional activity of scientists is considered Nowadays, improving the quality of higher education is education all over the world remains one of the most important and basic issues in the system. that is why there is also a need to research approaches to evaluating the quality of higher education.

Accordingly, ensuring the quality of higher education has various consequences and characteristics will have. Various researchers in the field of higher education ensure the quality of education they always rely on best practices when developing an adequate (suitable) system.

Ensuring the quality of education can be interpreted as "rules of engagement". will have clear consequences. At the same time intensive external control on the transparency of the quality of educational services that reduce the need There are also "unwritten rules. By way of conclusion, so far in terms of ensuring the quality of higher education the existing national and foreign experiences show that at present Reforms and innovations carried out separately and unsystematically in HEIs ineffective, which often undermines the overall effectiveness of higher education delivers.

Therefore, the quality of higher education has not yet been improved exchange the accumulated foreign experiences with the achievements of the national education system harmonizing only in a complex, systematic and whole way there is no doubt that the increase will raise the quality of higher education in our country to a new level. In all spheres of mental development, personal social relations change. In this process, the leading role of educational activity is at the junior school age does not exclude the active participation of the student in other activities, during it the child's new achievements are improved and strengthened. L.S. Vygotsky noted that the characteristic feature of primary school age is that the goals of the activity are mainly determined by adults for children.

Reforms in the field of higher education in the new Uzbekistan are currently in their infancy in terms of relevance and practical importance than reforms in other areas will not stay. These reforms are already showing results today. Above The information presented shows positive results in our educational system in this area a sign of the ongoing reforms on a wider scale will give.
